my day @ mpa - pioneers

Early Morning Arrival

Children are offered a continental breakfast each day consisting of fresh fruit, whole grain cereal and yogurt.

A little socialization and free play in the morning is a perfect way to get the mind and body ready for a full day of school.

Homework Zone

Busy parents rejoice!

Our staff provides the assistance and the quiet space for your child to complete their after-school assignments before they head home for the day, leaving more time for your family adventures!

Outdoor Exploration

After a long day of sitting at desks, your child needs some fresh air and space to run!

Children will enjoy exploring the loose parts on our natural playscapes or joining in a game of soccer on our open field.

Snack Time

Healthy snacks are offered to all children as they unwind from a busy school day.

Icebreaker

We begin each afternoon with a group challenge to unite as a class family.

School Holiday Program

Additional care options are available for your child during public school holidays and early dismissals.

Our teachers will provide them with an action-packed day full of planned activities and plenty of outdoor exploration!

Field Trips

Extended holidays from school mean more time for adventure!

We travel beyond the four walls of Magnolia Prep to keep your child active and busy while connecting them with their community!

Game Time

Each week, one collaborative game will be highlighted for the children to test their skills in challenges of the mind and the body!

STEM

Weekly STEM challenges require the entire class to work together to solve problems by combining various disciplines of Science, Technology, Engineering, and Mathematics.

Picasso's Protégés

Weekly lessons in artistic styles gives children an opportunity to release their inner Picasso and exercise their creative side!

Community Connections

Children will work together to plan, create, and implement activities to help the school family and various non-profit organizations within the community.

Creative Culinary

Children will be given the opportunity to create their own special dish!

Following a recipe is a great way to incorporate mathematics into a fun activity!

Enrichment Centers

Workstations are provided throughout the classroom that align to your child's interests in construction, art, fine motor skills, literacy, mathematics, writing, practical life, science, and sensory exploration.
